PROFILE SUMMARY

MCA graduate with skills in Web Development and Software Engineering. Experienced in developing web applications using React.js, Flask, and Django with a focus on user experience, website configuration, and performance optimization. Proficient in GitHub version control, Quality Assurance (QA), testing, and debugging. Ability to understand project requirements, Jira-based task management, and deliver high-quality solutions within deadlines.

TECHNICAL SKILLS

Programming: Python, SQL, Linux.

Frontend: HTML5, CSS3, React.js

Backend: Django, Flask,

Database Tools : Oracle, MongoDB, PostgreSQL

API Development: REST APIs, JSON API Integration, Object-Oriented Programming (OOP), SDLC, API Integration

Web & CMS: Content Management, Website Configuration, Page Structuring, Asset Management

Cloud & Infrastructure: AWS(EC2,S3,CloudWatch), Docker, Jenkins, CI/CD Pipelines.

Tools : Git, GitHub, JWTAuth, REST APIs, VS code,

EXPERIENCE

AWS & DevOps Intern — MicroDegree Solutions(Nov 2024–Jan 2025)

- Deployed and monitored applications on AWS EC2, S3, and CloudWatch to maintain availability.
- Built and maintained Dockerized applications to improve scalability and deployment consistency
- Designed and implemented CI/CD pipelines using Jenkins and GitHub for automated build and deployment
- Performed server monitoring, performance optimization, and security hardening in Linux environments.
- Worked in Linux/terminal environments and followed version control best practices using Git.

PROJECTS

1. AI Chatbot with LLM (GenAI + Python) | Oct 2025 – Dec 2025

- Developed a Generative AI chatbot using Python, OpenAI API, and LangChain to deliver context-aware conversational responses.
- Implemented prompt engineering and agent-based workflows to handle dynamic user queries and task execution.
- Integrated Retrieval-Augmented Generation (RAG) using document embeddings to enhance response accuracy and domain relevance.
- Followed structured coding practices and PEP8 standards while organizing the project modules.
- Deployed the chatbot as a Django REST API, enabling scalable backend integration and real-time interaction.

2. Hairstyle Image Classification(DeepLearning + Flask + React) | Jun 2025 – Jul 2025

- I developed a system that classifies hairstyles from images using a CNN-based deep learning model.
- Applied preprocessing steps like resizing, normalization, and image augmentation to improve accuracy.
- The model reached 85% accuracy and was connected to a Flask + React web interface for live predictions.

3. League of Legends Match Outcome Prediction(ML + Flask + Next.js) | Jan 2025 – Mar 2025

- I Built a model that predicts the winning team in League of Legends matches using player and champion data.
- It uses Convolutional Neural Network(CNN) and Gradient Boosting(XGBoost) algorithms for better prediction.
- The model achieved an 82% accuracy rate and was deployed using Flask and Next.js for real-time results.

EDUCATION

MCA — Srinivas Institute of Technology valachill, Mangalore(2025), CGPA:8.2

B.Sc — Govt First Grade College Thenkanidiyoor, Udupi(2023), CGPA :6.84

CERTIFICATES

Machine Learning—ETHNOTECH Academy(2025)

- Learned supervised & unsupervised ML algorithms.
- Completed hands-on ML model building using Python.

Deep Learning with TensorFlow — ETHNOTECH Academy (2025)

- Studied ANN, CNN, and RNN architectures.
- Implemented deep learning models using TensorFlow and Keras.
